EXPERIENCE

Frontend Developer Intern | Gomycode Lagos, Nigeria | Nov

2024 – May 2025

- Made responsive UIs using Html, Css, React.js, Bootstrap, and Tailwind improved overall usability.
- Added React-Router for seamless page navigation and S.P.A experience which reduced page transition time.
- Integrated third-party APIs like TheMovieDB to fetch and render dynamic data and increase the app interactivity.
- Worked on GitHub daily — handled version control, pull requests, and collaboration, Improving team workflow.

Frontend Developer | Personal Projects | Aug 2025 - Present

Restaurant Management Web App | <https://ave-restaurant-website-36og.vercel.app/>

- Improved the landing page by implementing a card carousel that uses Javascript fetch api to preview the restaurant menu, giving users the taste of experience.
- Developed a Contact form feature on the landing page to provide a mail communication medium for customers.

Movie Streaming Platform Landing Page | <http://netvoid.vercel.app/>

- Created an engaging landing interface using Html, Css, and Javascript, which improved user engagement.
- Enhanced the landing page with a movie carousel using FetchApi, which enhanced browsing for the users.

MFM Church Website page | <http://mfm-website-sand.vercel.app/>

- Built a React landing page to modernize first impressions, increasing user clarity and engagement.
- Added an event carousel with Fetch Api to show programs dynamically, improving visitor awareness.
- Embedded React-Router navigation to organize pages smoothly, making the site easier for users to explore.
- Created a Prayer Request and Contact form to enable direct member communication which boosted response efficiency.

CORE SKILLS

- **Html and Css:** Built clean, accessible, and responsible user interfaces
- **Javascript:** Added dynamic, interactive features across web pages and apps.
- **React JS:** Developed modern Spa components, routing, and state-based UIs
- **Bootstrap:** Styled fast, responsive layout using utility classes and components.
- **Tailwind Css:** Designed reusable, responsible UI elements with utility-first classes
- **Git:** Managed version control, branching, merging, and collaborative projectx
