LinkedIn: linkedin.com/in/akpanvictor · GitHub: github.com/heisave · Portfolio: akpanvictorportfolio.vercel.app

Frontend Developer who builds **responsive, maintainable interfaces** with React, TypeScript and Next.js. Has delivered features on a **production Next.js application** at Fabletoon Limited, built React interfaces during a frontend internship at GoMyCode, and deployed **four personal projects** end to end. Works in Git-based team workflows and writes component code that other developers can pick up and extend.

Live projects

EXPERIENCE

Frontend Developer
Fabletoon Limited
Jan 2026 — May 2026

- Built pages and components for Okuper, a **production Next.js application**, using **file-based routing** and a component-driven structure within a shared team codebase.
- Turned complex requirements into small, manageable tasks, then implemented **scalable application logic** for each one.
- Kept the shared codebase clean through **Git branching, committing and merging** alongside other developers.

Frontend Developer Intern
GoMyCode · Lagos, NG
Nov 2024 — May 2025

- Developed **responsive interfaces** with HTML, CSS, React.js, Bootstrap and Tailwind CSS, improving usability across devices.
- Reduced page transition time by adding **React Router** for single-page navigation.
- Handled version control and **pull requests on GitHub** every day, which improved team workflow.

SELECTED PROJECTS

Meridian Stem Academy
School landing page
Responsive school landing page.

Aniverse
Streaming landing page
Landing page for a **movie streaming platform.**

MFM Church Website
Church website
Church website.

Askout App
Interactive web app
Interactive page that asks for a visitor's name and reveals a personalised surprise.
